Access to Capitation

Level III

Access to Hidden Fields
Access to Core
No Access to Capitation

Level IV

Access to Hidden Fields
Access to Core
Access to Capitation

Level I is considered the lowest level of security. Nothing containing personal health information (PHI) or Capitation will be seen by the user.

Level II is for users to view Capitation data. No PHI will be seen by the user.

Level III is for users to see PHI data, but no Capitation.

Level IV is for users to see everything. Users can view unencrypted data (PHI) and Capitation data.
